Program Description and Justification

Justification for proposal change:

The proposed changes clarify the relationship between the MS and PhD degree programs as well as the admission requirements and standing of students admitted holding MS, MA, or M ARCH degrees.

The proposed changes also align areas of focus referred to in the descriptive text with current faculty research and teaching in the PhD Program.

Corresponding Degree

PhD Doctor of Philosophy

Is this program interdisciplinary?

No

Academic Level

Graduate

CIP Code

040902 - Architectural and Building Sciences/Technology.

Is This a Teacher Certification Program?

No

Will specialized accreditation be sought for this program?

No

Admission Requirements

Desired Effective Admissions Term

Fall 2020

Is this revision a change to the admission status of the program?

No

Provide a brief narrative description of the admission requirements for this program. Where relevant, include information about licensure requirements, student background checks, GRE and TOEFL scores, and admission requirements for transfer students.

Students may be admitted to the program in 1 of 4 ways as detailed below.

1. Students Entering the Program with a Bachelor's Degree

Students may be admitted to the Ph.D. program with a bachelor's degree. In this case, the student is required to complete 96 hours of coursework comprising Stages I, II, III.

2. Students Entering the Program with a Master of Science or Master of Arts Degree

Students may be admitted to the Ph.D. program having already completed a relevant Master of Science (M.S.) or Master of Arts (M.A.) degree, either at the University of Illinois Urbana-Champaign or at another institution. Using student transcripts, the Ph.D. committee, in consultation with prospective advisors in the student's area of focus, will determine during the admissions review whether the previously earned M.S. or M.A. degree meets the requirements for Stage I during the admissions review. If the M.S. or M.A. degree does meet the Stage I requirements, students must complete 64

hours of coursework comprising Stages II, III. If it is determined that the M.S. or M.A. degree does not meet the requirements for Stage I, then the student must complete 96 hours of coursework to complete Stages I, II, and III of the Ph.D. program.

3. Students Entering the Program Directly from the Master of Science in Architectural Studies Program in the School of Architecture from the University of Illinois Urbana-Champaign

Students may be admitted to the Ph.D. program directly from the M.S. in Architectural Studies in the School of Architecture. In these cases, students must complete 64 hours of course work beyond the M.S. coursework in order to complete stages II and III of the Ph.D. program. Students may petition for entry to the Ph.D. program at the end of their second semester in the MS program. Such petitions will be taken up and evaluated by the Ph.D. Committee in consultation with the student's M.S. advisor. The authority to admit or not admit these students to the Ph.D. program rests with the Ph.D. Committee. Students admitted in these cases will be awarded the M.S. Degree provided they complete a terminal research project under the guidance of the primary M.S. advisor.

4. Students Entering the Program with a Master of Architecture (M.ARCH)

Students may be admitted to the Ph.D. program after having completed a M.ARCH at the University of Illinois or another institution. In these cases, students may petition the Ph.D. Committee for advanced standing in Stage I, where up to 16 hours of the M.ARCH course work may satisfy elective hours required in Stage I. Coursework used to satisfy elective hours in Stage I must be focused on research topics, including research methods courses or advanced subject area coursework applicable to the prospective student's focus area in the Ph.D. Program. Design-based seminars and studios will not be considered.

Notes:
1. All course required work must be completed in accordance with the Graduate College requirements for residency and any other Graduate College requirements.

2. The Graduate College Handbook shall be the governing document in any case where a conflict exists between unit documents and the Graduate College Handbook.

Describe how critical academic functions such as admissions and student advising are managed.

Admissions are managed by the PhD committee. Student advising is managed by individual faculty who are assigned as advisor upon admission.

Enrollment

Describe how this revision will impact enrollment and degrees awarded.

There will be no impact on enrollment and degrees awarded.

Estimated Annual Number of Degrees Awarded

What is the matriculation term for this program?

Fall

Delivery Method

Is this program available on campus and online?

No

This program is available:

On Campus

Budget

Are there budgetary implications for this revision?

No

Will the program or revision require staffing (faculty, advisors, etc.) beyond what is currently available?

No

Resource Implications

Facilities

Will the program require new or additional facilities or significant improvements to already existing facilities?

No

Technology

Will the program need additional technology beyond what is currently available for the unit?

No

Non-Technical Resources

Will the program require additional supplies, services or equipment (non-technical)?

No

Resources

Faculty Resources

Please address the impact on faculty resources including any changes in numbers of faculty, class size, teaching loads, student-faculty ratios, etc. Describe how the unit will support student advising, including job placement and/or admission to advanced studies.

No Impact on faculty resources.

Library Resources

Describe your proposal's impact on the University Library's resources, collections, and services. If necessary please consult with the appropriate disciplinary specialist within the University Library.

No Impact on faculty resources.

Instructional Resources

Will there be any reduction in other course offerings, programs or concentrations by your department as a result of this new program/proposed change?

No

Does this new program/proposed change result in the replacement of another program?

No

Does the program include other courses/subjects impacted by the creation/revision of this program?

No

Financial Resources

How does the unit intend to financially support this proposal?

There are no financial implications for the unit.

Will the unit need to seek campus or other external resources?

No

Will an existing tuition rate be used or continue to be used for this program?

Yes

Is this program requesting self-supporting status?

No

Program Regulation and Assessment

Briefly describe the plan to assess and improve student learning, including the program's learning objectives; when, how, and where these learning objectives will be assessed; what metrics will be used to signify student's achievement of the stated learning objectives; and the process to ensure assessment results are used to improve student learning. (Describe how the program is aligned with or meets licensure, certification, and/or entitlement requirements, if applicable).

This is a highly individualized course of study. Learning outcomes vary by student and are aligned with areas of research focus. Year-end student progress reports are prepared by the student and the advisor and reviewed by the Ph.D. committee to monitor progress in the program.

Is the career/profession for graduates of this program regulated by the State of Illinois?

No

Program of Study

"Baccalaureate degree requires at least 120 semester credit hours or 180 quarter credit hours and at least 40 semester credit hours (60 quarter credit hours) in upper division courses" (source: https://www.ibhe.org/assets/files/PrivateAdminRules2017.pdf). For proposals for new bachelor's degrees, if this minimum is not explicitly met by specifically-required 300- and/or 400-level courses, please provide information on how the upper-division hours requirement will be satisfied.

All proposals must attach the new or revised version of the Academic Catalog program of study entry. Contact your college office if you have questions.

Revised programs

10KS5642PHD Architecture, PhD March 2020.docx

Attach a side-by-side comparison with the existing program AND, if the revision references or adds "chose-from" lists of courses students can select from to fulfill requirements, a listing of these courses, including the course rubric, number, title, and number of credit hours.

Catalog Page Text

Catalog Page Text: Description of program for the catalog page. This is not official content, it is used to help build the catalog pages for the program. Can be edited in the catalog by the college or department.

This program offers advanced training for those students whose goal is a career of research and scholarship in academia, industry, or government. Four areas of focus are offered: History and Theory, Environment and Technology, Health and Wellbeing, and Urbanism. The program is administered jointly with the Department of Landscape Architecture.

Research Methods

Students must complete at least one research methods course.

In addition to research methods courses taught within the School of Architecture and Department of Landscape Architecture, students are encouraged to consider similar courses in other units, consulting with their advisors to determine whether those meet the research methods requirement.

Preliminary Exams

In consultation with their advisors, students select a committee of faculty members for their preliminary exam. Upon completion of coursework, students prepare a dissertation proposal and undertake the preliminary examination in two parts: written and oral.Policies governing the preliminary examination are detailed in the Ph.D. Program Handbook. Upon passing the preliminary examination, students are advanced to candidacy and may proceed with work on their dissertations.
Dissertation

Because the Doctor of Philosophy degree is primarily a research degree, candidates are required to demonstrate a capacity for independent research by producing an original dissertation on a topic within the discipline of Architecture.
Dissertation Defense

After completion of the dissertation, the student is required to defend the dissertation before their Dissertation Committee in a public forum, an event known in the Graduate College as the Final Exam.

Statement for Programs of Study Catalog

96-hour program for students entering with a Baccalaureate degree.

Code	Title	Hours
All students are required to enroll in the PhD colloquium during the fall of their first year of course work.
